## BACKGROUND

The pharmaceuticals is a critical industry that moves one trillion dollars per year. Pharmaceuticals are the fastest growing market segment in the air cargo industry. Random temperature changes during transportation can be a serious threat to the integrity of these sensitive products.

.....

## ELAL FIRST ACTIVE

Is designed for the transportation of temperature-sensitive commodities that require the use of an active temperature controlled unit. This service is an ideal solution for high value health care products, food products, electronic goods and any other commodities that are extremely sensitive and time and temperature critical.

.....

## ELAL FIRST PASSIVE

EL AL supports the leading technologies in the area of passive temperature controlled units. Advanced vacuum insulation panels (VIP) inside the packages, create the perfect cooling chain for the customers products.

.....

## ELAL FIRST BENEFITS

- 1st Priority Booking.
- Minimal Tarmac Exposure Times and Storage in Temperature-Controlled Conditions.
- Shipments Travel in Temperature-Controlled Cargo Compartments. No split policy.
- Special Containers with Active / Passive Temperature Control.
- CSafe RKN Recording of Temperature Data.
- Documentation of the Transportation Chain
- Trained personnel.
